

## Image Manipulation using Colour Magic

Using images from:

Digital Camera

Collected from the internet

<http://gallery.e2bn.net/index.php>

<http://www.nationalgeographic.com/index.html>

<http://pics.tech4learning.com/index.php>

<http://www.ltscotland.org.uk/5to14/resources/illustrations/index.asp>

<http://www.geograph.org.uk/>

Screen captures from digital movies

Movie Maker is great for doing this

Pictures drawn by pupils and scanned in

Photographs brought in by pupils and scanned in

Images scanned in from magazines or newspapers

You can scan directly into Colour Magic

## Using Colour Magic you can:

Create stamps

Select/distort images - Transformation

Posterise

Invert

Control colours - Hue (Andy Warhol style)

Alter brightness and contrast

Increase/decrease intensity of colours -

Saturation

Create a mosaic

Blur images - Median

Produce a grain effect - Noise

Emboss

Paint or spray from clipboard

Turn images into line drawings - Bleach

Combine two or more pictures into one

## These images can then be used to:

Illustrate work

Create PowerPoint presentations

Create a story in Photo Story

Create a story in Movie Maker

Design posters, magazine covers, calendars and loads more from this great website - <http://bighugelabs.com/flickr>

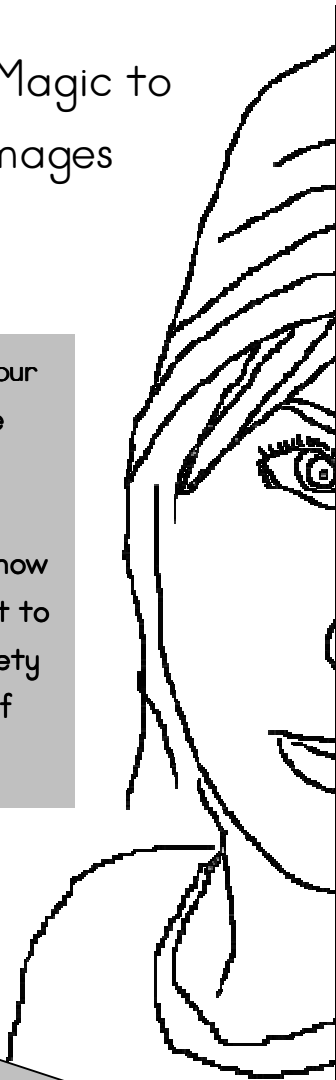

Design and create greeting cards, you could create a template in Word or Publisher

Design and create fridge magnets, using self adhesive magnetic paper

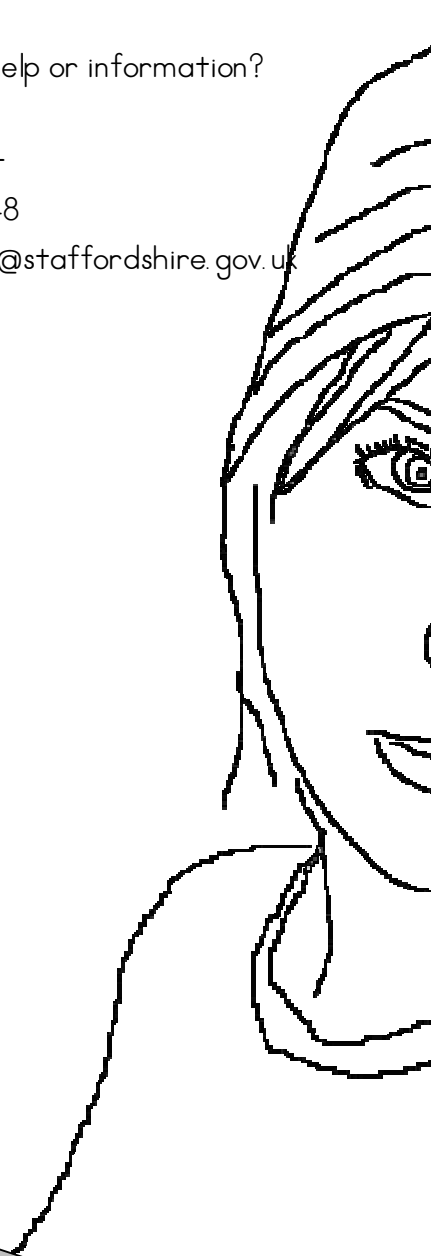

## Using Colour Magic to manipulate images

Don't mistake Colour  
Magic for a simple  
painting package!  
With a little  
imagination and know  
how, you can use it to  
manipulate a variety  
of images in lots of  
interesting ways!
